

ADEQ's Mission

To protect, enhance and restore the natural environment for the well-being of all Arkansans

What You Can Do

- **Reduce** the amount of stuff you buy. Seriously consider what you will actually use before buying more.
- **Reuse** items as long as they're functional or find other ways to use them.
- **Recycle** items you can't use to save resources in the manufacture of new items.

ADEQ: What We Do

The Department of Environmental Quality is an agency of the state of Arkansas. We are headquartered in North Little Rock and have offices and inspectors throughout the state.

Our regulatory programs for air, water, solid waste, hazardous waste, petroleum storage tanks and mining help protect Arkansas's environment. We issue operating permits for businesses and farms and monitor for compliance.

We also manage programs to assist businesses, educators and the public with regulatory, recycling and other issues. ADEQ offers loans and tax credits for environmental improvement projects.
